

## COOPERATION AGREEMENT

Management Observatory Foundation and Innolearn Cluster are coordinators of clusters gathering companies operating in the area of ICT and technology enhanced learning. We are actively supporting the development of Information Society in our countries and helping our members to win the market with revolutionary products.

This letter underlines the intention of the signees to explore opportunities for collaboration and cooperation in projects for developing digital learning methodologies, tools and products. The scope of this collaboration is to share knowledge and good practices, research new types of products, and forming partnerships in projects that can provide mutual benefit. The cooperation will cover such topics as:

- New media use for learning and knowledge management
- Multimedia materials production
- Video and sound transmission for learning purposes
- Creation of knowledge developing societies
- Using of mobile devices to enhance learning
- Research on digital learning usability

Activities, scope and budget of every project will be additionally regulated by specific agreement specifying the roles of both organizations.

This agreement was prepared in two copies, one for every partner.
